Software Developer – Mid/Senior level

Job location
Derby (Pride Park)

Salary
£37,500 – 42,500 per annum + benefits

Job type
Permanent. Office based, some home working considered

About Liaison

Liaison saves the public sector real money in the key areas of finance and workforce management. We're passionate about what we do because we help lots of organisations to improve the way they spend their money – notably the NHS. Founded 30 years ago, we've come a long way since then. Today the company boasts a workforce of more than 250 people with a headquarters located in the historic city of Worcester, along with many remote workers across the length and breadth of the UK.

The team

The team is one of the main advantages of working for Liaison. They are incredibly helpful, friendly and knowledgeable. Within the Derby office there is a group of talented Developers and Testers who are building our new in-house comprehensive Workforce Management system which is used by a good proportion of the NHS.

The team is working on this Greenfield project using Clean Architecture. They are forward-thinking and always looking for new ways of working. The office is modern, bright, with a friendly atmosphere and free food.

The Team Leaders understand that Developers want to focus on their main responsibilities. They therefore highlight that they take away any minor issues, allowing you to focus and deal with code.

Some home working could be considered, particularly once fully trained. Across the country we focus on quality work and autonomy, therefore our confidence in your ability and hard work is common-place.

Main responsibilities

Liaison are looking for a Senior Developer ready to step up and take on their next challenge. You will be working in an Agile way on a project replacing an existing system with the latest technology stack.

You will contribute thoughts and ideas in daily stand ups to move the project forward and be responsible for shaping the product as it grows. We work within story points, where you will be dedicated to building one part of the system within an allotted timeframe, then move onto the next section. As the infrastructure grows you will focus on high quality code, ensuring that it is robust, and is consequently feasible and practical for the user.

As this role is mid or senior level, you will be expected to step up and help shape the system, offering ideas wherever possible.

Experience/qualifications needed

We are seeking candidates with an Undergraduate level Computer Science or Software Development Degree (or equivalent). Demonstrable experience within a similar position is integral to the success of the position.

Requirements include:

Essential
- .Net C#
- Entity Framework
- Web API
- Agile experience

Desirable
- JavaScript
- .Net Core experience
- Angular 2+ experience
- Kendo UI experience
- SQL
- GIT experience
- RESTful API
- TypeScript
- Bootstrap
- Clean Architecture

Benefits of working for Liaison

Liaison believes that working life should be a happy and healthy one.

We offer all staff a wide variety of company benefits as well as the opportunity to get involved in a range of company organised events; from regular physical challenges all the way to bi-annual staff away days and social events - plus others too.

Our wide range of staff benefits aim to have an impact on both home and working life for all staff, while at Liaison.

Liaison promote progression and development, where it is common for people after a period of time to move between roles to strengthen their skills and experience. People are also promoted from within when recognised for their hard-work and relevant skills.

If you would like to be part of Liaison, please send your CV and a covering letter to
